

REMARKS

Supplemental to Applicants' amendment and response of September 29, 2004, Applicant has added two corresponding method claims. The method of claim 18 is based on the use of the inkjet element of claim 1 in an inkjet printer as originally disclosed. Claim 19 is based on the recitation on page 17, lines 3 to 5, that UV absorbers are optional. Consequently, claims 1, 4-15, and 17-19 are presently pending in the application.

Concurrently, Applicants intend to abandon concurrently filed copending US Application S.N. 10/017,937 (docket 83824) that originally and separately contained the corresponding inkjet printing method claims.

Favorable reconsideration in view of the foregoing amendments and the Applicants' remarks in Applicants' amendment and response of September 29, 2004.

Respectfully submitted,

Chris P. Konkol
Attorney for Applicant(s)
